Are your Web-posted pictures safe?

Today's technological advances are both a blessing and a curse. We can now take photos with our cell phones and quickly post them on the Web. But did you know that the location where the photo was taken is also part of the photo's data?

The below YouTube link contains a news broadcast that shows how easily location information can be obtained. This is especially frightening with photos of children and it can jeopardize their safety.

The good news is the story provides direction on how to make a simple adjustment in your cell phone settings to block access to the location information.

Hurricane Season is still here:

Don't let the mild storm season thus far, lull you into a false sense of security. We have been very lucky; but historically we are entering the most active part of the year and Hurricane Season runs until November 30th.

So, please continue to monitor activity via the media and maintain your property. Both actions will help your family and your neighbors from being caught off guard, while reducing the potential for damage or injury should a storm decide to visit our area.

Replacements: Since 2010, each new vehicle purchased for Patrol use has come with an extended 5-year Warranty. As such, the "life" of these vehicles can be extended to 4 years; as any major repair would be covered.

**** "Engine Miles":** Per Automotive Industry Standards, idle time causes engine wear equivalent to being driven. Per Ford, that equivalent is 33 miles per hour; which is reflected in the August report. Previously, we were told it was 13 miles per hour. Dodge is 27 miles per hour.
