Criminal Activity:

Here is a listing of crime/suspicious activity reported to ORPD in February 2013 for both Ocean Ridge and Briny Breezes:

Type of Incident	Report Date	Time Frame	Location	Synopsis
Battery/Domestic Violence and Violation of No Contact Orders	02/04/13	4:27 PM	5600 blk N. Ocean Blvd.	Boyfriend/girlfriend argument becomes violent. Boyfriend arrested. This was the 3 rd arrest in as many weeks for the male.
Identity Theft	02/12/13	10/20/12 – 02/12/13	6800 blk N. Ocean Blvd.	Following theft of Passport in NY, unknown persons withdrew \$25,000 from bank account.
Violation of Town Code/Vacation Rentals	02/15/13	9:34 AM	6000 blk N. Ocean Blvd.	Investigation on-going regarding numerous short-term home rentals for less than 30-days.
Burglary	02/16/13	02/15/13 5:00 PM – 02/16/13 9:00 AM	Oceanfront Park 6415 N. Ocean Blvd	Unknown person forced entry into Life Guard stand and stole a City of Boynton radio.
Burglary	02/21/13	02/18/13 5:00 PM – 02/21/13 10:00 AM	6500 blk N. Ocean Blvd	Unknown person entered open garage/storage area and removed golf clubs.
Identity Theft	02/22/13	02/21/13 3:00 PM – 02/22/13 9:25 PM	5500 blk N. Ocean Blvd.	Persons unknown made fraudulent charges to victim's credit card
Stolen Vehicle Recovered/Arrest made	02/23/13	3:57 PM	5000 blk Old Ocean Blvd.	Victim reported vehicle stolen. Description provided to local agencies. Vehicle located by Boca Raton Police within an hour and driver arrested.
Stalking/Arrest made	02/27/13	02/24/13 9:00 AM – 02/27/13 5:37 PM	100 blk Ruthmary Ave., Briny Breezes	Former boyfriend continued to harass victim via telephone calls & messages.
(Continued)				

Burglary	02/28/13	3:50 PM	100 blk Hudson Ave.	Couple approached by 2 males indicating they were doing work for the Cable Co. While being distracted, 3 rd male entered home and stole items. Three Hispanic males fled in a red SUV.

Free Document Shredding:

Frequent readers of this Newsletter are aware of the often listed crimes of Identity Theft and Fraud that are reported monthly. Some of these cases are the result of paperwork being improperly disposed of that falls into the hands of criminals. In an effort to make sure that old documents (i.e.: bank statements & checks, bills, credit cards & receipts, etc.) are properly destroyed, the Police Department has made arrangements with CINTAS Document Management for free document shredding on Friday, April 19th from 9:00 AM – 12 Noon. This will take place in the rear parking lot of Town Hall.

The date was selected in conjunction with the Federal Income Tax deadline date of April 15th. This will allow an opportunity for residents to discard older, unnecessary personal documents while filing away items from 2012.

This service is for Ocean Ridge and Briny Breezes residents ONLY. The amount of paperwork per household is limited to the equivalent of 3 office storage boxes of personal documents.

The event is on a first-come, first-served basis and no pre-registration is required.

Vehicular Traffic Increasing:

As a result of last year's closure of Lantana's Ocean Ave. Bridge, we are experiencing our first "Season" with increased traffic along A1A. The Ocean Ridge Police Department has responded to an unusually high number of crashes over the past few months and this bridge is scheduled to remain closed until November 2013. Unfortunately, we will soon be facing the impact of a second bridge closure; the Flagler Bridge in Palm Beach.

For boaters, the work in and around these bridges has and will cause additional issues. You may also experience delays due to the rescheduling of the opening of these & other drawbridges to accommodate the increased vehicular traffic.

In addition to the traffic issues created by these bridge closures, during the month of March there are several bicycle/running events passing thru Ocean Ridge and Briny Breezes along A1A. Check the listing in this Newsletter for specific dates & times.

REMEMBER: Please be careful and walk, run, bike, & drive SAFELY!

“Safe Boating” Opportunities:

The Ocean Ridge Police Department has partnered with the United States Coast Guard Auxiliary to offer residents Safe Boating Classes and/or free Vessel Safety Checks.

Safe Boating Classes are available for a nominal fee. These one day classes will satisfy the Florida Department of Natural Resources boating requirements. A Florida Fish & Wildlife Safe Boaters I.D. Card is mailed upon completion, and a certificate is presented at the end of class. Topics include Navigation, Trailing, Anchoring, Safety, Linehandling, Seamanship, Laws, and Docking.

The courtesy Vessel Safety Check (VSC) is performed at your boat by a certified Vessel Examiner, and usually takes up to 30 minutes depending upon the size of your boat. Boats that pass the examination are awarded a distinctive VSC Decal that alerts the Coast Guard, Harbor Patrol, Fish & Wildlife, and other law-enforcement agencies that your boat was found to be in full compliance with all Federal and State boating laws.

Why have your boat examined? In a word – SAFETY! You are left with the peace of mind that your boat meets minimum safety standards and that - in an emergency - you will have the necessary equipment to save lives and summon help. Additionally, you may avoid substantial fines should you ever be boarded by law enforcement and found to be in violation of these standards. Finally, your insurance rates may be lowered – check with your agent.

More info is available through the Coast Guard Auxiliary @ 561-715-6061 or 561-818-7905.

How Do I Protect the Information on My Smartphone?

From the Desk of William F. Pelgrin, Chair

We've come to depend on our smartphones so heavily it is hard to remember what we did before we had them. If you have a smartphone, you now carry a fully functional computer in your pocket or purse. That's a tremendous amount of information at your fingertips! Therefore, it is paramount that you safeguard the smartphone.

Common Risks for Smartphones

Take a moment to consider each of these areas:

- **Loss of device and information theft.** Smartphones are small and can easily be lost or stolen. Unauthorized users may access your accounts, address lists, photos, and more to scam, harm or embarrass you or your friends; they may leverage stored passwords to access your bank and credit card accounts, steal your money or make credit card charges; gain access to sensitive material, and more.
- **Social Engineering.** A common mobile threat is social engineering. Whether via text message, image, or application to download, an incoming communication may be an attempt to gain access to your information. A current example consists of a text message that comes from an unknown number, telling you that if you click on the link provided, you'll have access to thousands of free ringtones. If this sounds too good to be true, that's because it is. The link is in fact a malicious link. Clicking on it will compromise the security of your smartphone.
- **TMI (Too Much Information).** Guidelines for protecting privacy, safety, and reputation when sharing via computers also apply when sharing via smartphones. Mobile devices enable instantaneous capturing, posting, and distribution of images, videos, and information. They may also broadcast location information.
- **Public Wi-Fi.** Smartphones are susceptible to malware and hacking when leveraging unsecured public networks.
- **Bluetooth and Near Field Communications (NFC).** Bluetooth is a wireless network technology that uses short-wave radio transmissions to transmit voice and data. NFC allows for smartphones to communicate with each other by simply touching another smartphone, or being in proximity to another smartphone with NFC capabilities or a NFC device. Risks with using NFC and Bluetooth include eavesdropping, through which the cyber-criminal can intercept data transmission, such as credit card numbers. NFC also has the risk of transferring viruses or other malware from one NFC-enabled device to another.

Simple Steps to Protect Your Smartphone:

1. **Update the operating system.** Smartphones are computing devices that need to be updated. Updates often provide you with enhanced functionality and enriched features, as well as fixes to critical security vulnerabilities. Your smartphone manufacturer should notify you whenever an update is available.
2. **Use of security software is a must.** As the smartphone market is increasing, so too is the amount of malware designed to attack smartphones. The software security solutions that are available for desktops and laptops are not as widely available for smartphones. A key protection is to use mobile security software and keep it up-to-date. Many of these programs can also locate a missing or stolen phone, will back up your data, and even remotely wipe all data from the phone if it is reported stolen.
3. **Password-protect your device.** Enable strong password protection on your device and include a timeout requiring authentication after a period of inactivity. Secure the smartphone with a *unique* password – not the default one it came with. Do not share your password with others.
4. **Think before you click, download, forward, or open.** Before responding, registering, downloading or providing information, get the facts. No matter how tempting the text, image, or application is, if the download isn't from a legitimate app store or the site of a trusted company, don't engage with the message.
5. **Understand the terms of use.** Some applications claim extensive rights to accessing and leveraging your personal information. If the app requires more access to your account and/or device than is needed to run the service, do not continue. In addition, be aware that terms can change over time. Review your terms of use often.
6. **Be cautious with public Wi-Fi.** Many smartphone users use free Wi-Fi hotspots to access data (and keep their phone plan costs down). There are numerous threats associated with Wi-Fi hotspots. To be safe, avoid logging into accounts, especially financial accounts, when using public wireless networks.
7. **Disable Bluetooth and Near Field Communication (NFC) capabilities when not in use.** Capabilities such as Bluetooth and NFC can provide ease and convenience in using your smartphone. They can also provide an easy way for a nearby, unauthorized user to gain access to your data. Turn these features off when they are not required.
8. **Enable encryption.** Enabling encryption on your smartphone is one of the best ways to safeguard information stored on the device, thwarting unauthorized access.
9. **Securely dispose of your device.** With the constant changes and upgrades in the smartphone market, many are upgrading their devices on a regular basis. It is important that you wipe the information from your smartphone before disposal. Additionally, make sure any SD cards are removed and erased. If you are not redeploying the SIM card to another device, then make sure your personal information stored on the SIM card is erased or destroyed.

The information contained in the above links is provided by the MS-ISAC for informational purposes only. The MS-ISAC does not warrant the accuracy of the information contained in the above links or commit to issue updates or corrections to the information. The MS-ISAC is not responsible for any damages resulting from use of or reliance on the information. The information provided in the Monthly Security Tips Newsletters is intended to increase the security awareness of an organization's end users and to help them behave in a more secure manner within their work environment. While some of the tips may relate to maintaining a home computer, the increased awareness is intended to help improve the organization's overall cyber security posture. This is especially critical if employees access their work network from their home computer. Organizations have permission and are encouraged to brand and redistribute this newsletter in whole for educational, non-commercial purposes.
