

## EMERGENCY WATER PURIFICATION

Boil water at a full rolling boil for at least 1  
minute, chill before drinking.

OR

Add 8 drops of *unscented* chlorine bleach  
to 1 gallon of water and mix.

Let stand for 30 minutes and check for a slight  
chlorine odor.

Use 16 drops of bleach for cloudy water.

After purification, place water in the  
refrigerator to improve taste.

OR

Use bottled water.

### Acceptable uses of tap water during a Boil Water Order:

Dish washing by hand, rinsing with bottled or  
boiled water

Clothes Washing

Bathing and showering (Do not expose open  
wounds to the water)

Car Washing

Lawn watering

Household cleaning

### Unacceptable uses of tap water during a Boil Water Order:

Dish washing by a machine

Drinking

Ice making

Tooth brushing

Cooking, unless the water is boiled for 1 minute

Washing fruits and vegetables

As a general rule, do not drink the water and do not  
eat anything that has been in contact with the water.

**Immunocompromised people should use bottled  
water to avoid health risks.**

---

## BOIL WATER NOTICE

---

Due to the following condition:  
**Broken Water Main**

---

**You will have to temporarily  
disinfect your drinking water.**

Please follow the Emergency Water Purification  
procedure on the other side of this card until  
further notice. You will be notified by a blue All  
Clear Notice when the water is safe to drink.

*This will take at least 48 hours.*
