Re: Town Manager Report – October Commission Meeting Update

Oceanfront Park

Striving to avoid legal/logistical conflict serving the public in operations and events at Boynton Beach’s Oceanfront Park; the Town Attorney, Engineer and staff are researching official boundary and jurisdiction on the property as determined in historical documents, deeds and intergovernmental agreements. The search has revealed discrepancies in official boundaries of the beachfront park. We are working with Boynton Beach to provide additional documentation and proof of the actual legal description and boundaries of the park. They have submitted conflicting documents in applications for permits, events and use in the past, as well as in regards for liability cases. The Town Clerk and Attorney found pertinent information embedded in the “Special Acts adopted by the Legislature of Florida” (1931) and we’re progressing it forward through documents to create the current map.

Light the Lights

The Garden Club requested Friday, November 30th as our Light the Lights holiday event, which is the traditional time slot utilized the last several years, a week after Thanksgiving. This gives the organization optimal set-up and decoration time compatible in their schedules. It does not conflict with other area holiday events by surrounding municipalities.

A-1-A Waterline Break Repaving Contract to Let

Based upon estimates provided by Boynton Beach Utility subcontractors, and Town of Ocean Ridge Codes and purchasing policies, we will have to request quotes to competitively award repaving of the section of FDOT’s A-1-A (near Ocean Ave.) disrupted by this summer’s waterline break and repair job. With Commission consensus, this will be the first Capital Project expenditure project to be authorized in the FY19 cycle.

Respectfully,
Town Manager
